

”LEARN TO EARN”

**BASIC TRAINING IN HOW TO USE THE
DISAB PRODUCTS IN A SAFE AND
ECONOMIC WAY**

Presentation of the training

Background

DISAB Vacuum Technology AB has been training operators for 30 years. At present we are facing increased requirements from authorities and organisations on documentation in how we safeguard the skill of the operators handling the DISAB products. Above all, awareness of risks in the working environment as well as safety are required for people working with our machines. We have therefore prepared a training programme called “Learn to Earn” for our customers. The training aims at assuring that current rules and regulations stipulated by authorities and employers regarding safety and economy are being complied with. All training is carried out in our premises in Eslöv, Sweden, or at a place convenient to the customer.

Purpose

Handling airborne material is a hazardous working method requiring careful preparation and skilled operators. Our training is specifically intended for operators handling DISAB equipment. We welcome newly and temporarily employed, operators, supervisors and service technicians to participate in the training.

Aim

After completed training session, the participants should have a thorough knowledge in how to safely and economically operate the vehicle.

Following subjects are included:

- Introduction in vacuum operation
- Introduction in blowing
- Introduction in application
- Introduction in the technology
- Common areas of application
- Pressure and speed
- Operator instructions
- Maintenance instructions
- Control system
- Preventive maintenance
- Frequently asked questions (FAQ)
- Certificate

Risks & Safety:

- Safety from a general point of view
- Regulations
- Working nearby the machine
- Securing the equipment
- Systematic work environment protection
- Risk analysis
- Plan of actions
